## Profile

Software developer with experience in designing, developing, and deploying scalable web applications. Passionate about building efficient, high-performance solutions that enhance user experience and system reliability.

## Professional Experience

**Freelance Software Developer** 07/2022 – present

- Developed and deployed scalable web applications, optimizing performance and user experience
- Built and maintained RESTful APIs for seamless frontend-backend communication
- Implemented Redux for state management and deployed applications on Vercel
- Integrated third-party APIs to enhance application functionality

**Claims Analyst, Penda Health** 03/2024 – 08/2024 | Nairobi

- Developed custom scripts to automate claims processing and reporting
- Assisted in backend optimization, enhancing data processing speed
- Implemented data validation mechanisms to improve accuracy

**Technical Support, KCB Group** 08/2023 – 02/2024 | Nairobi

- Provided technical support for web-based applications, troubleshooting backend and system issues
- Assisted in database query optimization, improving system efficiency
- Worked on API integrations and security enhancements
- Automated repetitive tasks, improving system monitoring and performance

## Education
